UNDONE

LOVE. LUST. LA.

LOGLINE

WHERE WORLDS COLLIDE

A guarded city-girl and an All-American boy fall fast in La La Land **but can their spark bridge their worlds?**

THEMES

UNDONE is a raw, intimate love story about a Black/Biracial woman navigating **Love, Identity**, and **Belonging** in modern America.

Nuanced, emotionally honest, and effortlessly funny, the series explores **Modern-Dating, Culture, The Cost of Ambition, Sisterhood**, and the quiet ache of **Existing Between Worlds** – black and white – yet never fully accepted by either.

Set against the seductive backdrop of Hollywood, UNDONE examines what happens when love collides with **Trauma, Family Expectations, Race**, and **Inherited Bias**.

UNDONE lives in the spaces between **Intimacy & Identity, Connection & Perception, Love & Survival**.

UNDONE

THE WORLD

BONDS THAT BREAK & BIND

UNDONE is also a story about the power of female friendships **and the women who hold each other together when the world does not.**

Co-workers, kehlani & kaylee share a protective and deeply lived-in friendship; a space where vulnerability can exist without performance.

Jackie, kehlani's hair braider and maternal anchor embodies the quiet intimacy of black womanhood: the rituals, wisdom, and unspoken care passed between generations of women.

Beneath the romance and tension is a deeply human portrait of the Emotional refuge women create for one another.

Created by women, the series is committed to portraying female characters & relationships with authenticity, complexity, contradiction, and depth.

FOUR WORLDS COLLIDE

Music Focus

The pulse of the show is a Hip-Hop, R&B influence combined with a Folk, Blue-grass vibe, seamlessly illustrating the meeting of two worlds.

Racial Tension

Unspoken boundaries, microaggressions, and the weight of identity in a city that promises belonging but delivers division.

Social Spheres

The overlap between Hollywood elites, creatives, and curated online personas creates a complex social landscape.

These intersections often carry an undercurrent of tension, as status, perception, and ambition quietly shape every interaction.

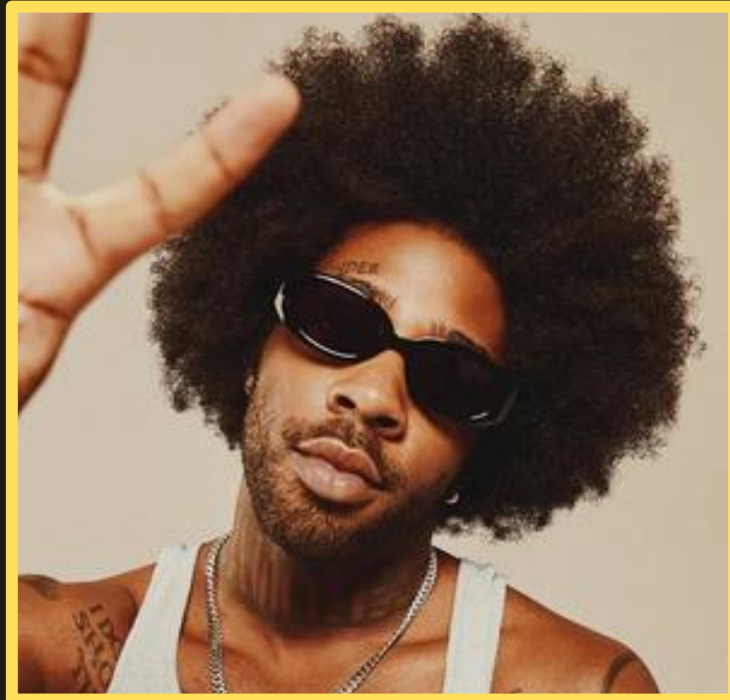

Small Towns, Big Dreams

Meeting parents, friends, travelling interstate, and feeling increasingly alienated, characters are confronted with unfamiliar environments and unspoken expectations.

Old fears resurface and new ones form forcing them to navigate parts of themselves they thought were left behind.
